

JON BUOY RECOVERY MODULE MK 6

The JBRM6 is a full man overboard solution enabling deployment of a device that can locate, support and recover a MOB.

It is accepted as a direct replacement for one traditional danbuoy, horseshoe, drogue, light and whistle, specified within the World Sailing Offshore Special Regulations, where two would normally be required.

To launch the JBRM6, a single latch provides a quick and intuitive release into the water. When operated, the JBRM6 deploys directly from the container, inflating automatically, immediately providing a high visibility safe haven. This supports the casualty comfortably out of the water, reducing the risk of hypothermia whilst awaiting recovery. The MOB is recovered horizontally, particularly important with a possibly hypothermic casualty and reducing the chance of complications or cardiac arrest during recovery.

Key features

- Single action deployment
- Compact & lightweight
- Aesthetic slimline container
- Container available in white, black carbon style or customised container finish*
- Automatic inflation
- Tailored buoyancy design
- SOLAS automatic light
- Intuitive boarding assistance
- Integrated water stability system
- Lifting harness
- SWL of 200kg
- Retro-reflective binding
- 5m throwing quoit & line
- AIS attachment point
- 2 year service intervals

* Customised container finish by special order only.
